PROFESSIONAL SUMMARY

Software engineer with a strong foundation in computer science, full-stack development experience, and hands-on machine learning project work. Demonstrates consistent work ethic, integrity, and ability to perform under pressure through sustained academic achievement and competitive athletics. Communicates effectively and works collaboratively in team environments. Adept at customer facing roles and effectively creating welcoming and energizing environments. Strong leadership skills developed through captainship and coaching. Intrinsicly motivated with a strong passion and ability to think creatively applied through game development and social media.

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, Java, SQL, PHP
- Frameworks & Tools: React, Django, Flask, SQLAlchemy, Bootstrap, Docker, Git
- Domains: Full-stack development, ML-based document analysis, web systems, game development, algorithms, databases, HCI
- Coursework: Algorithms, Operating Systems, Databases, Data Analytics, Parallel Computing, Software Engineering, Artificial Intelligence, Numerical Analysis, Game Development
- Ancillary: Microsoft Word, Powerpoint, Excel. Adobe Creative Suite: Photoshop, Illustrator, Premier Pro. Davinci Resolve. Godot. Procreate. Aseprite.

EDUCATION

- University of British Columbia – Bachelor of Science in Computer Science (2025)
- Cumulative Average: 92%
- Dean's List (Five Consecutive Years)
- Academic All-Canadian (Five-time)
- Deputy Vice-Chancellor Scholarship Recipient (Four-time)

ENGINEERING & SOFTWARE PROJECTS

- Capstone Software Engineering Project – BFL Canada

- Developed a web application to automate the comparison of insurance policy documents using supervised machine learning.
- Implemented full-stack architecture with React, TypeScript, Django, and SQLAlchemy, including authentication and role-based access.
- Containerized and deployed the system using Docker on university infrastructure.
- Collaborated in a four-person Agile team and contributed to documentation and code reviews.
- Discord-Inspired Messaging Platform
 - Created a messaging and collaboration platform applying standard software engineering practices.
 - Built using HTML, CSS, Bootstrap, Flask, and MySQL with modular components.
 - Coordinated integration between back-end APIs and user interface.
- UBC Community Forum Web Application
 - Designed a Reddit-style forum for UBC community groups using PHP and XAMPP.
 - Implemented account management, posting features, and group navigation.

LEADERSHIP & TEAM EXPERIENCE

- USPORT Developmental Player – Winnipeg Sea Bears CEBL (2025)
 - Competed with and against high-level professional athletes.
 - Learned valuable communication, teamwork, and competitive skills necessary to thrive in a dynamic high performance setting.
- USPORT Men's Basketball – University of British Columbia (2020-2025) Lakehead University (2025 – 2026)
 - Served as team captain for three seasons.
 - Balanced full-time athletics with a strong academic record.
 - Contributed to cultivating a collaborative and accountable team environment.
- Summer Youth Basketball Coordinator/Coach – Basketball Manitoba (2025)
 - Organized instructive and encouraging free youth basketball sessions for families to discover the joy of athletics and basketball in a fun and nurturing environment.
- Head Coach & Player Development Coach – GW Hoops, Blaze Basketball (2023 - Current)
 - Led U15 boys' program and supported U14/U17 teams.
 - Mentored youth athletes and coordinated training programs.
 - Managed communication and planning within staff and parent groups.
- Basket Instructor – PGC Basketball (2023)
 - Delivered youth development sessions across North America.
 - Emphasized communication, leadership, and safety.

- Received training from established collegiate and professional coaches focused on developing leadership, communication, and teaching skills.

WORK EXPERIENCE

- Scout and Gameday Analytics Intern – Brampton Honey Badgers CEBL (Current)
 - Produced in depth analysis of prospective players. Combining both qualitative and quantitative assessment in a high paced, high stakes environment.
- Graduate Assistant – Lakehead University (2025 - 2026)
 - Supported instruction across upper-level computer science courses including software engineering and data science.
- Content Creator & Social Media Manager – BALLOGY (2021 – 2024)
 - Produced educational and skill-development content garnering hundreds of millions of impressions.
 - Managed content planning and brand messaging.
- Customer Service – Family Squeezed (2022)
- Landscaping – All Occasions (2023)
- Landscape & Grounds Maintenance Town of Beaverlodge (2014 - 2020)
 - Lawn mowing, weed trimming, tree planting, pruning, gardening, and general property upkeep including basic carpentry and construction.
 - Operated hand and power tools (ride on/push lawn mowers, string trimmers, axes, shovels, rakes, hedge trimmers, snow blowers, power washers, chainsaws, drills, saws, hammers).

COMMUNITY INVOLVEMENT

- Weekly fall skill development clinics with Junior Heat basketball (2020 – 2024).
- Virgin Radio Kelowna Holiday Toy Drive 2024.
- Bi-weekly work at the Kelowna food bank helping package and distribute food.
- Free basketball training with low-income youth in Kelowna.
- Installation of a recycled rubber base for the Hythe Regional School playground.
- Highway cleanup fundraisers for Hythe Regional School.
- Landscaping and construction for community members and the Hythe Regional School playground.
